

COLORChrome™

Metallic Epoxy Systems

Product Description

ColorChrome™ pigment is a metallic mica pigment designed to be dispersed in a variety of binders to create seamless floors with a unique three dimensional appearance. Depending on the application techniques used, the finished floors appearance can range from elegant to exotic. ColorChrome™ pigment is ideal product for retail establishments, night clubs, and automotive showrooms to residential interior and garage floors, or any installation the desires a truly unique finished floor. When combined with the proper binders and finish coats can offer an unmatched blend of beauty and durability.
